INVESTMENT MADE EASY!

Learn More

[^] The Manager intends to declare and pay monthly dividends. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. The Manager may, at its discretion, pay dividend out of capital. Payments of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Sub-Fund's capital or effectively out of capital may result in an immediate reduction in the Net Asset Value per Unit of the Sub-Fund and will reduce any capital appreciation for the unitholders of the Sub-Fund.

CSOP HSCEI Covered Call Active ETF (2802.HK)

The **investment objective** of the Fund is to generate income and maintain prospects for capital appreciation while mitigating some downside risk through the use of covered call strategy. It should be noted that the use of covered call strategy also limits potential upside.

Covered Call Strategy: Income Generator with Downside Buffer

Income Generation

Enhanced Income in Low-Rate Environment

2802.HK targets **monthly distribution** through the **income from option premium and dividends from the underlying stocks**, making it appealing in the current **low-interest environment**.

1-Month HIBOR and SOFR^A

Downside Buffer

Downside Protection in Volatile Markets

Serving as a **partial cushion against market downturns**, option premium helps **reduce losses and portfolio volatility** compared to just holding stocks.

HSCEI Covered Call Strategy Performs More Resilient in Downside Market*

Easy Investment

Easy Access to Options Strategies

With US\$8.6Bn in notional derivatives exposure[#], CSOP offers a **professionally managed ETF for investors' easy access to covered call strategies** without the complexity of self-maintenance.

Covered Call ETF

- Easy to trade with a stock account
- Professional management by leading issuer

Self-Managed Covered Call

- **Margin accounts are required to trade options.** Mismanagement of positions may trigger unintended leverage and margin calls.
- **Sophistication of option trading** (Rolling frequency, Option strike price, Maturity, etc.)

CSOP HSCEI Covered Call Active ETF (2802.HK)

Source: CSOP. *Please note that some fees may be increased up to a permitted maximum amount by providing one month's prior notice to Unitholders. Please refer to the section headed "Fees and Charges" in Part 1 of the Prospectus for details. [#] As the Fund is newly set up, this figure is a best estimate only and represents the sum of the estimated ongoing charges over a 12-month period, expressed as a percentage of the estimated average NAV over the same period. It may be different upon actual operation of the Fund and may vary from year to year. For the first 12-month period from the launch of the Fund, the ongoing charges figure is capped at 2% of the average NAV of the Fund. Any ongoing expenses exceeding 2% of the average NAV of the Fund during this period will be borne by the Manager and will not be charged to the Fund. ^AEstimated for reference only, the issue price of the Listed Class during Initial Offer Period is 8.8 HKD per unit.

Active Investment Strategy

The CSOP HSCEI Covered Call Active ETF seeks to achieve its investment objective by primarily (i) investing in constituent equity securities in the Hang Seng China Enterprises Index (the "Reference Index" or the "HSCEI"); and (ii) selling (i.e. "writing") call options on the Reference Index to receive payments of money from the purchaser of call options (i.e. "premium").

Investing in constituent equity securities in HSCEI

Directly in HSCEI Equities; and/or (50% to 100% of NAV)

In long positions of HSCEI futures (notional value up to 50% of NAV)

In HSCEI ETFs (up to 30% of NAV)

Selling call options on HSCEI

Selling listed or OTC HSCEI Call Options (Notional value ranges from 70% to 100% of aggregate value of exposure to constituent securities in HSCEI)

Top 10 HSCEI Constituents

#	Code	Constituent Name	Sector	Weight(%)
1	9988	BABA - W	Consumer Discretionary	9.74

What is Covered Call?

A "Covered Call Strategy" is an options trading strategy which involves **holding a long position** in a particular asset (for example, a stock, a commodity, a bond, a currency or an index), whilst **writing call options on the same asset simultaneously**.

Payoff Diagram of Covered Call Strategy

Good Player in Range-trading Market

Adopting Covered Call Strategy in Different Market Scenarios

Bullish market scenario (worst case)

- Upside is limited to the HSCEI call options' strike price plus the premium received.
- Call option exercise will trigger cash payment to the purchaser at expiry.

Range-trading market scenario (best case)

Covered call strategy can generate positive returns if:

- The asset price stays below strike price at expiry.
- The cash payment at expiry to the purchaser is less than the premium received.

Bearish market scenario

- Option premium offsets some losses from market drop.
- Premium may not fully cover sharp market declines.
