Attention: Ms. Queency Chen / Mr. Marcus Ho / Mr. Edwin Lam / Ms. Florence Tsang / Ms. Stephanie Lau / Ms. Li-Chien Wong

Dear Sirs,

Company : **Nanjing Silicon Intelligence Technology Group Co., Ltd. (南京硅基智能科技集团股份有限公司) (the “Company”, together with its subsidiaries, the “Group”) (Applicant Code: AM23128)**

Case Number : **20250825-123128-0001**

Transaction Type : **New Listing – Primary Listing on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”)**

Subject : **Responses to Comments on the Application Proof prospectus and related submissions**

We, CMB International Capital Limited and DBS Asia Capital Limited, acting as the joint sponsors (the “**Joint Sponsors**”) to the Company, refer to your comment letter dated November 24, 2025 (the “**1st SEHK Comment Letter**”) and the SFC’s comment letter dated November 27, 2025 (the “**1st SFC Comment Letter**”) in respect of the Company’s Application Proof prospectus (the “**Application Proof**”) and related submissions dated October 31, 2025.

As instructed by and on behalf of the Company, we hereby submit the following documents for your review:

- (1) the responses to the 1st SEHK Comment Letter as set out in Appendix II to this letter;
- (2) the responses to the 1st SFC Comment Letter as set out in Appendix III to this letter;
- (3) the revised full set prospectus of the Company dated April 10, 2026 (the “**Post Application 1st Proof**”);
- (4) the strikethrough version of Post Application 1st Proof;
- (5) all the revised pages since the Application Proof; and
- (6) certain A1 documents in connection with updating the Track Record Period to include the year ended December 31, 2025, the detailed list of which was set out in Appendix I to this letter.

The Company respectfully submits that no material information has been removed from the Post Application 1st Proof compared with the Application Proof.

Unless otherwise defined, the capitalised terms used herein shall have the same meanings as those defined in the Post Application 1st Proof.

Should you have any questions in relation to the above, please do not hesitate to contact any of the following persons of the Joint Sponsors as follows.

Appendix I

Item No. Ref.	Document Type	File Name	Description of Document
1.	MB Chapter 9 Documents	Profit and working capital forecast memorandum	Advanced draft memorandum of profit forecast of the Group and memorandum of working capital forecast of the Group (a clean version and a redlined version against the version submitted on October 31, 2025)
2.	MB Chapter 9 Documents	Form FF004	The contact information and personal particulars of Mr. Liu Zixuan (劉子軒), the non-executive Director
3.	IPO Checklists	Attachment M104(1) – Form M111	Market comparable analysis (a clean version and a redlined version against the version submitted on October 31, 2025)
4.	IPO Checklists	Attachment M104(2) – Trade receivables analysis	An analysis by age group and major clients of trade receivables and subsequent settlement
5.	IPO Checklists	Attachment M104(3) – Trade payables analysis	An analysis by age group and major suppliers of trade payables and subsequent settlement
6.	IPO Checklists	Attachment M104(4) – PRC legal opinion	Advanced draft of PRC legal opinion (a clean version and a redlined version against the version submitted on October 31, 2025)
7.	IPO Checklists	Attachment M104(5) – Confirmation letter from the Reporting Accountants regarding section 5 of Form M104	Confirmation letter from the Reporting Accountants regarding section 5 of Form M104
8.	IPO Checklists	Attachment M104(7) – Listing expenses	Breakdown of expenses relating to the listing charged by the respective parties (a clean version and a redlined version against the version submitted on October 31, 2025)
9.	IPO Checklists	Attachment M104(8) – Management continuity analysis	Memorandum on management continuity (a clean version and a redlined version against the version submitted on October 31, 2025)

10.	IPO Checklists	Attachment M104(9) – Ownership continuity analysis	Memorandum on ownership continuity (a clean version and a redlined version against the version submitted on October 31, 2025)
11.	IPO Checklists	Attachment M104(10) – Summary of material findings	A summary of material findings of the Joint Sponsors and the Reporting Accountants regarding section 10 of Form M104 (a clean version and a redlined version against the version submitted on October 31, 2025)
12.	IPO Checklists	Attachment M104(11) – M112	Details of applications for waivers from strict compliance with the Listing Rules
13.	IPO Checklists	Attachment M104(12) – Other matters	Other matters that may assist the Stock Exchange’s consideration of the Company’s listing application (a clean version and a redlined version against the version submitted on October 31, 2025)
14.	Other Correspondence to HKEX	Reporting Accountants’ confirmation	Confirmation from the Reporting Accountants that no significant adjustment is expected to be made to the historical financial information and the pro forma financial information included in the Application Proof

Appendix II
Responses to the 1st SEHK Comment Letter

No.	Stock Exchange's comments and Company's responses	Post Application 1st Proof Page No.
MAJOR ISSUE		
1.	Business Sustainability. The Group recorded net losses and net operating cash outflows throughout the Track Record Period. Based on the profit and working capital forecast memorandum (the “ Memorandum ”), the Group will still be loss-making for the year ending 31 December 2025 and 31 December 2026 with an expected net loss of RMB57 million and RMB17 million, respectively. However, the Prospectus and the Memorandum lack meaningful discussion and analysis on the underlying reasons for the Group's loss-making and net operating cash outflow positions, and the current disclosure on the Group's path to profitability is not forthcoming for readers to assess the achievability of profitability and the expected timeframe. In light of the above, please address the following with substantially enhanced disclosure in the “Summary”, “Business” and other relevant sections of the Prospectus (e.g. pages 18, 212 to 216):	
(i)	<i>Reasons for historical net losses, adjusted net losses, net operating cash outflows, net current liabilities and net liabilities</i> – disclose the underlying reason(s) for the Group's net losses, adjusted net losses, net operating cash outflows, net current liabilities and net liabilities recorded during the Track Record Period; and highlight, under the “Recent Developments” subsection (page 18), that the Group is expected to record a net loss in 2025 and the reason(s) therefor;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	13, 179 to 182
(ii)	<i>Path to profitability</i> –	
	(a) disclose, with robust basis, the Directors' and Sponsors' views in respect of the sustainability of the Group's business;	
	Please refer to the revised disclosure in the Post Application 1st Proof. <u>Joint Sponsors' Due Diligence</u> The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to disagree with the Directors' views in respect of the sustainability of the Group's business: (i) discussed with the management of the Company to understand, among others, (a) sustainability and scalability of the Group's business, (b) measures and future strategies for revenue growth, managing costs and	185

	improving operational efficiency, and (c) the prospects of the global digital human agent markets and industries where the Group's enterprise customers operate; (ii) discussed with the management of the Company in relation to the profit and working capital forecast to understand, among others, (a) the assumptions and basis adopted in preparing the Memorandum, (b) the existing agreements/on-hand orders of the Group, and (c) the expected growth pattern and performance indicators of the Group's business and the bases and references adopted in making such expectations; (iii) reviewed the Group's historical financial information and conducted financial due diligence interview with management of the Company to understand, among others, (a) the financial performance of the Group's business during the Track Record Period, (b) existing cash resources and available banking facilities of the Group, (c) reasons for the Group's loss-making, net operating cash outflow positions and net liabilities recorded during the Track Record Period, (d) the Group's planning and measures in improving its liquidity, and (e) the latest development of the Group's business operation and financial performance after the end date of the Track Record Period; (iv) conducted due diligence interviews with certain customers who are expected to contribute a major part of the revenue generated from GJ Autopilot AIGC Agent for the upcoming year to understand the Group's operation status as well as the ongoing business relationship of such customers; (v) conducted due diligence interviews with and site visits to major customers, suppliers and banks of the Group to verify the authenticity and accuracy of the historical transactions with such third parties during the Track Record Period, and to understand the Group's operation status as well as the ongoing business relationship and historical contract performance of such third parties; (vi) obtained and reviewed, on a sampling basis, the walkthrough documents (such as agreements, order confirmation, delivery documents or invoices) for the transactions between the Group and its major customers and suppliers during the Track Record Period; (vii) obtained and reviewed the background search reports of the major customers and suppliers of the Group issued by an independent third-party background search agency, which did not identify any material investigations, disputes, penalties or negative news that may materially affect business relationship between the Group and such third parties; (viii) obtained and reviewed the industry report issued by CIC (the "Industry Report"), and discussed with CIC on its view (a) on competitive strengths of the Group and profitability of market players in the digital human agent industry in China, (b) that there is considerable demand for digital human agents in China, (c) that the	
--	--	--

	digital human agent markets where the Group operates have substantial growth potential, and (d) that there has been no material industrial updates which would materially affect the Group's outlook and prospects since the end date of the Track Record Period and up to the Latest Practicable Date; (ix) discussed with the Reporting Accountants and understand that that they performed procedures on the Historical Financial Information (as defined in the Accountants' Report) as a whole in accordance with HKSIR 200 "Accountants' Reports on Historical Financial Information in Investment Circulars" issued by the HKICPA. Based on the work performed so far, and subject to the completion of certain outstanding matters as highlighted in the Reporting Accountants' confirmation submitted herewith, no significant adjustment is expected to be made to the draft Accountants' Report; (x) discussed with the PRC Legal Advisors and understand that there has been no material change in the currently effective PRC laws relating to the Group's business which would materially affect the Group's business operation and financial position since the end date of the Track Record Period and up to the Latest Practicable Date; and (xi) obtained and reviewed the background search reports of the Group issued by an independent third-party background search agency and the legal opinion issued by the PRC Legal Advisors (the "PRC Legal Opinion") to understand that there was no material litigation or governmental penalty which would give rise to unforeseeable legal costs or material adverse impact on the Group's business operation and financial position.	
	(b) substantially enhance the discussion on each of the Group's strategies and specific measures to turn around its positions of net losses, adjusted net losses, and net operating cash outflows, and how each of the strategies and measures is achievable, including the implementation status and how the Group would be able to capture the demand going forward and compete with existing and potential players;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	182 to 184
	(c) substantiate the effectiveness of these strategies and measures to improve the Group's financial performance with support of quantitative information and taking into account the historical track record and industry trend; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	182 to 184
	(d) submit a net profit and cash flow breakeven, cash conversion cycle and cash burn analysis <u>with detailed assumptions and bases</u> and a commentary on how long the Group can support its business operations and expansion plans with its existing financial resources (1) with the IPO proceeds and (2) without the IPO proceeds;	

	<i>Net profit and cash flow breakeven:</i> The Company remained in loss-making positions at the IFRS net profit level in FY2025 and FY2026 primarily due to front-loaded R&D investment, non-recurring listing expenses; and selling and marketing expenses. The Company recorded adjusted net profit of approximately RMB13.9 million after adding back listing expenses and equity-settled share-based payment expenses in FY2025. This reflects the underlying operational breakeven of the Company. Therefore, the Company also expects to (1) achieve operating breakeven and maintain adjusted net profit in FY2026; and (2) maintain a strong financial position in FY2026, supported by the net proceeds from the Global Offering and improving operating cash flows. The Company expects to start generating positive operating cash flow by FY2028, which is supported by sustained revenue growth, stable gross margins, and improvement of account receivable turnovers in FY2026 and FY2027. <i>Basis and assumptions:</i> <i>Revenue Growth:</i> The revenue forecast for FY2026 is prepared with reference to (i) the revenue generated during the three years ended December 31, 2025; (ii) existing customer contracts, renewal patterns of the existing business and contracts under negotiation; and (iii) expected contribution from GJ Autopilot AIGC Agent, which commenced commercialization during the 4th quarter of 2025; and (iv) the industry outlooks. The forecast revenue growth from FY2025 to FY 2026 is supported by the existing signed contracts and customer pipelines covering more than 50% of the projected revenue in FY2026; and the rest is derived from expected orders which are in advanced or confirmed negotiation stages. Based on the above, the total revenue is expected to grow by approximately 39.5% to RMB1,100 million in FY2026 as compared to FY2025 reflecting initial commercialization progress. The Company considers that the expected revenue for FY2026 provides a foundation for continued growth beyond FY2026. <i>Stable Gross Margin:</i> Cost of sales mainly comprise project fulfilment costs, cloud service fees, hardware and software costs and staff costs. It is expected that the gross profit margin will improve slightly in FY2026 at approximately 35.4% mainly due to the change in revenue mix and ongoing cost control measures. In particular, the Company anticipates an increasing revenue contribution from the GJ Autopilot AIGC Agent business, which features a higher degree of automation, resulting in relatively lower costs and higher margins, as evidenced by the recent performance. Other major cost assumptions include (i) selling and marketing expenses, it is expected to increase in FY2026 which is consistent with the revenue growth and expansion of new business lines; (ii) administrative and other operating costs, it is expected to continue increasing in FY2026 due to the non-recurring	N/A

	listing expenses; and (iii) research and development expenses, it is expected to increase in FY2026 due to higher cloud service fees and staff costs associated with continued investment in AI algorithms, computing power and product enhancement in order to maintain the reliability and technological integrity of its solutions. <i>Accounts Receivable and Expected Impact on Operating Cash Flow:</i> The Company does not expect to experience material improvement in accounts receivable turnover in FY2026. While the product mix will begin to shift in FY2026 with the gradual contribution from GJ Autopilot AIGC Agent, such contribution is not expected to be sufficient during FY2026 to materially alter the Company's overall credit profile or collection cycle. In addition, while the Company will seek to further diversify its customer base within its existing business, including increasing engagement with non-SOE customers who typically have relatively shorter payment cycles, the impact of such diversification efforts is not expected to be significant in FY2026. Accordingly, net AR turnover days in FY2026 are expected to be approximately 111 days and remain broadly in line with FY2025 of 119 days. The Company expects a more visible improvement in AR performance as (i) the GJ Autopilot AIGC Agent accounts for a larger proportion of total revenue and generally adopts more structure terms, and (ii) the customer base becomes more diversified. In particular, the increasing proportion of non-SOE customers, which typically have relatively shorter payment cycles compared to certain SOE customers, is expected to improve overall collection efficiency and reduce the concentration of long-aged receivables. Such improvements is expected to alleviate working capital pressure and contribute positively to operating cash inflows, thereby supporting the Company's target of generating positive operating cash flow by FY2028. <i>Cash Conversion Cycle (CCC):</i> The Company's CCC increased to around 85 days in FY2025 and it is expected to decrease to 76 days in FY2026. This movement primarily reflects the result of the expansion of Autopilot AIGC Agent projects and an increase in signed agreements with major enterprise customers. Most of the outstanding trade receivables are from reputable state-owned and institutional customers under the signed agreements. The Company continues to implement systematic receivable management under its Sales Revenue Management Policy, which includes periodic aging reviews, phased collection targets, and approval requirements for any extension of credit period. With strong operating cash flow generation, unutilized banking facilities of RMB310 million as of February 28, 2026 and expected IPO proceeds of approximately HK\$1,279.1 million, the Company expects to be able to maintain sufficient liquidity to support the longer conversion period during this stage. <i>Cash Burn Analysis:</i> For demonstration purpose, the cash burn rate refers to the average monthly (i) amount of net cash used in operating activities, including research and development expenses, administrative and other operating expenses and	
--	---	--

	selling and marketing expenses, (ii) capital expenditures and (iii) lease payment. It is estimated that the Company will receive a net proceed of approximately HK\$1,279.1 million in the Global Offering, based on an Offer Price of HK\$245.31 per share. The Company had cash and cash equivalents of RMB217.8 million as of December 31, 2025, which will be able to maintain the Company's financial viability for over 18 months from December 31, 2025, <u>without</u> taking into the account the estimated proceeds from the Global Offering, or it is estimated the Company will be able to maintain the financial viability for 111 months, if the Company takes into account the estimated net proceeds from the Global Offering.	
(iii)	Working capital – justify, with support of quantitative and qualitative analyses, how the Directors and the Sponsors are satisfied that the Group is able to meet the working capital requirements for at least the next 12 months from the date of the Prospectus under Rule 8.21A; and	
	The following submission demonstrates that the Company possesses sufficient liquidity and working capital to meet its operational and financial obligations for the next 12 months from the date of publication of prospectus, which is June 2027 based on the current proposed timetable. In addition to the expectation that the Company will maintain adjusted profit in FY2026, the Company has secured sufficient unutilized banking facilities to meet its financial needs, which provide a strong solid financial and liquidity foundation for operations. Operating Cash Flow: Although the Company recorded net operating cash outflows during the track record period, operating cash flows are forecasted to improve in FY2026 due to (i) revenue growth from GJ AI workforce solutions, including contributions from the GJ Autopilot AIGC Agent; and (ii) relatively stable gross profit margins during the FY2025 and FY2026. Financial resources: In addition to internally generated cash flow, the Company's financial resources include (i) existing cash and cash equivalents of RMB217.8 million as of December 31, 2025; (ii) the ability to utilize banking facilities if required: the Company has obtained unutilized banking facilities in the amount of RMB310 million as of February 28, 2026; and (iii) estimated net proceeds of approximately HK\$1,279.1 million from the Global Offering, expected to be received in or around June 2026. Historical Net Operating Cash Outflows and Losses: During the Track Record Period, the Company recorded net operating cash outflows and net losses, which were primarily attributable to (i) significant upfront investments in R&D development, including cloud service fees and computing power; (ii) expansion of personnel and infrastructure to support future growth; and (iii) non-recurring items, including listing expenses and accretion of redemption liabilities; the later of which ceased following the	185

	termination of redemption obligations in November 2024. The Directors consider that the losses and cash outflows were invest-driven and non-recurring in nature, and do not reflect a structural inability of the Group to generate operating cash flows. Having taken into account the Working Capital Forecast, the result of sensitivity analysis, the Company's historical financial performance, existing cash resources, available banking facilities and the estimated net proceeds from the Global Offering, the Directors confirm, and the Joint Sponsors concur, that the Company has sufficient working capital to meet its present requirements for at least the next 12 months from the date of the prospectus. <u>Joint Sponsors' Due Diligence</u> The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to disagree with the abovementioned views of the Directors: (i) discussed with the management of the Company to understand, among others, (a) basis of the Directors' view on working capital sufficiency, and (b) the Group's working capital management; (ii) discussed with the management of the Company in relation to the profit and working capital forecast to understand, among others, (a) the assumptions and basis adopted in preparing the Memorandum, (b) the existing agreements/on-hand orders of the Group, and (c) the expected growth pattern and performance indicators of the Group's business and the bases and references adopted in making such expectations; (iii) reviewed the Group's historical financial information and conducted financial due diligence interview with management of the Company to understand, among others, (a) the financial performance of the Group's business during the Track Record Period, (b) existing cash resources and available banking facilities of the Group, (c) reasons for the Group's loss-making, net operating cash outflow positions and net liabilities recorded during the Track Record Period, (d) the Group's planning and measures in improving its liquidity, and (e) the latest development of the Group's business operation and financial performance after the end date of the Track Record Period; (iv) obtained and reviewed the Group's plan for use of proceeds and the underlying documents, and discussed with the management of the Company in relation to, among others, (a) the rationale, current status, overall planning and expected schedule of the plan of use of proceeds, and (b) the Group's plan to profitability under the plan of use of proceeds; (v) obtained and reviewed the breakdown of the Group's cash and cash equivalents during the Track Record Period, breakdown of the Group's unutilized banking credits, and relevant banking credit agreement or	
--	---	--

	approval notices (where applicable); (vi) conducted due diligence interviews with and site visits to major customers, suppliers and banks of the Group to verify the authenticity and accuracy of the historical transactions with such third parties during the Track Record Period, and to understand the Group's operation status as well as the ongoing business relationship and historical contract performance of such third parties; (vii) obtained and reviewed, on a sampling basis, the walkthrough documents (such as agreements, order confirmation, delivery documents or invoices) for the transactions between the Group and its major customers and suppliers during the Track Record Period; (viii) obtained and reviewed the background search reports of the major customers and suppliers of the Group issued by an independent third-party background search agency, which did not identify any material investigations, disputes, penalties or negative news that may materially affect business relationship between the Group and such third parties; (ix) obtained and reviewed the Industry Report, and discussed with CIC on its view (a) on competitive strengths of the Group and profitability of market players in the digital human agent industry in China, (b) that there is considerable demand for digital human agents in China, (c) that the digital human agent markets where the Group operates have substantial growth potential, and (d) that there has been no material industrial updates which would materially affect the Group's outlook and prospects since the end date of the Track Record Period and up to the Latest Practicable Date; (x) obtained a copy of the draft private letter on working capital sufficiency statement from the Reporting Accountants, and discussed with the Reporting Accountants to understand their work on working capital sufficiency statement, which is in accordance with HKSIR 500 and with reference to HKSAE 3000 issued by the HKICPA. Those standards require that the Reporting Accountant shall plan and perform the work to obtain reasonable assurance as to whether the Directors have made the statement relating to the sufficiency of working capital of the Group, in the form and context in which it is made, after due and careful enquiry. However, the Reporting Accountants accept no responsibility for the accuracy and realization of the working capital forecast and their work is substantially less in scope than an audit conducted in accordance with HKSAAs; (xi) discussed with the PRC Legal Advisors and understand that there has been no material change in the currently effective PRC laws relating to the Group's business which would materially affect the Group's business operation and financial position since the end date of the Track Record Period and up to the Latest Practicable Date; and (xii) obtained and reviewed the background search reports of the Group	
--	---	--

	issued by an independent third-party background search agency and the PRC Legal Opinion to understand that there was no material litigation or governmental penalty which would give rise to unforeseeable legal costs or material adverse impact on the Group's business operation and financial position.	
	details of the Group's working capital management during the Track Record Period and going forward, in particular, how to ensure its working capital sufficiency going forward, taking into account its net operating cash outflow and net losses during the Track Record Period;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	185
(iv)	Memorandum – update the Memorandum based on the latest market data and include a comparison with the same period in 2024 and the forecast for the remaining months of 2025; and	
	Please refer to the updated Memorandum.	N/A
	justify the forecast revenue growth in 2025 and 2026 with quantitative information (such as the amount and percentage of forecast revenue which is supported by signed contracts/backlog); and	
	Please refer to the updated Memorandum.	N/A
(v)	Overall – disclose additional operating data and financial data, including but not limited to net dollar retention rate, average revenue per customer, the movement of backlog value and number of projects, and revenue, gross profit margin, average project value by type of solution (e.g. GJ AI Real-time Voice Agent, GJ AI Video Generation Agent, GJ AI Live Streaming Agent, GJ AI Real-time Video Agent), with a commentary on any material fluctuations;	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company further submits that the operating and financial data of GJ AI Video Generation Agent and GJ AI Live Streaming Agent cannot be presented separately, as the Company's contracts entered into with customers are typically bundled orders combining live streaming and video generation services, with the required voice and images uniformly priced.	4, 134, 135, 136, 148, 149
	highlight the difference between “total contract value” and “total revenue”, and explain why the number of customers is larger than the number of projects throughout the Track Record Period; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	134, 135
	move upfront the risks associated with the Group's net losses and net operating cash outflows in the “Summary” and “Risk Factors” sections (i.e. pages 10 and 44).	

	Please refer to the revised disclosure in the Post Application 1st Proof.	6, 35
DISCLOSURE ISSUES		
2.	Relationship with Customer A. Considering the growth in revenue contribution from Customer A (i.e. China Mobile Communications Group Co., Ltd.) during the Track Record Period from 17% in 2022 to 64% in 2024 and 64% in six months ended 30 June 2025, please address the following (pages 184 and 185):	
(i)	discuss the underlying driver(s) of the increase in revenue contribution from Customer A during the Track Record Period, and advise the forecast revenue contribution from Customer A in 2025 and 2026; and	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company expects its revenue from Customer A to reduce to less than RMB366 million in 2026, representing less than 35% of the Company's total revenue for the same year.	153, 154
	disclose, with support of the Industry Consultant's view, whether it is an industry norm for digital human agent providers in the PRC to have high customer concentration; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	153
	elaborate on the Group's measures in diversifying its customer base given the decrease in its number of customers during the Track Record Period (page 185);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	154
(ii)	further elaborate on the " <i>mutually beneficial</i> " relationship between the Group and Customer A given the significant difference in business scale of the Group and Company A and that the business relationship only started in 2022 (in particular, explain how Customer A integrates the Group's solutions into its own solutions, and subsequently sells the final solutions to its customers, duration of the agreements with Customer A, whether the Group is the only supplier for Customer A in providing the real-time video agent solution and justify the " <i>high switching costs</i> " considering the project-based nature of the Group's solutions); and	
	The Company has revisited the disclosures on its relationship with Customer A and toned down the descriptions on " <i>mutually beneficial</i> " to avoid misleading. Please refer to the revised disclosure in the Post Application 1st Proof.	153, 154
(iii)	prominently highlight the Directors' view (with basis) on whether the relationship between the Group and Customer A is likely to materially adversely change or terminate in the foreseeable future; and	

	Please refer to the revised disclosure in the Post Application 1st Proof.	155
	move upfront the risk factor on customer concentration on page 48.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	35
3.	International Sanctions Risks. Please further enhance the disclosure in relation to the Group’s business activities with international sanctions exposure in the “Business” section, briefly explain why the Group’s business activities are subject to international sanctions exposure in the “Summary” section (instead of merely stating the view of the Directors), and address the following (pages 17, 208 to 210):	
	Please refer to the revised disclosure in the Post Application 1st Proof.	10, 11, 173
(i)	disclose the amount of procurement (i.e. cloud computing services, high-performance computing hardware and related firmware and driver software) from each of Supplier A (i.e. Huawei Cloud Computing Technologies Co., Ltd.) and Supplier Y during the Track Record Period;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	174
	advise the identity of Supplier Y; and	
	The Company respectfully submits that the identity of Supplier Y is SITONHOLY (Tianjin) Technology Co., Ltd. (思腾合力（天津）科技有限公司).	N/A
	clearly explain the application of the abovementioned procurement in the Group’s business operations;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	174
(ii)	with support of the Industry Consultant’s view, discuss the availability of alternative suppliers in the PRC, who are not on the BIS Entity List, that could provide the Group with cloud computing services/non-U.S.-origin high-performance computing hardware and related firmware and driver software of comparable technological sophistication and commercial terms; and	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company further submits that: As for the cloud computing services: According to CIC, the public cloud and private cloud markets in China are characterized by full competition and a high degree of price transparency, with a wide range of alternative cloud service providers that are not on the BIS Entity List, offering services with comparable technological sophistication and commercial terms. The Group has reviewed and prepared	175

	a list of such alternative cloud computing service providers. If the Group switches to alternative cloud providers for future projects, the transition can be executed technically and seamlessly, without affecting project performance or user experience. The change of the cloud service providers would not have any material impact on the financial condition of the Group. As for the high-performance computing hardware and related firmware and driver software: The Group does not currently or in the foreseeable future require the purchase of new high-performance chips or hardware. In addition, according to CIC, the computing industry in China is fully competitive, with a range of Chinese companies that are not included on U.S. export control lists. These companies supply high-performance computing hardware and software, the principal components of which do not involve U.S.-origin items. The Group has reviewed and prepared a list of alternative suppliers that provide high-performance chips or hardware. Regarding any specific sanction or export control risk to the Group, it should be noted that purchasing non-U.S. origin goods from an entity-listed Chinese supplier is not an EAR-prohibited transaction. Therefore, the Group is not prohibited from, nor would it be violating U.S. export control regulations by purchasing non-U.S. origin products from a BIS-Entity listed Chinese supplier.	
(iii)	disclose, with support of the view of the legal advisors and Directors, how the <u>latest development</u> of relevant international trade policies could impact the Group's business operations; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	175, 176
	advise the Sponsors' view, with due diligence performed, on the competency and the experience of Mr. Arthur Chiu, the Sanctions Legal Advisors.	
	The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to cast doubt on the competency and the experience of Mr. Arthur Chiu, the Sanctions Legal Advisor: (i) obtained and reviewed the legal memorandum in respect of International Sanctions issued by the Sanctions Legal Advisor; (ii) conducted expert due diligence interview with the Sanctions Legal Advisor, to understand, among others, (a) the background, qualifications, professional experience and independence of the Sanctions Legal Advisor, (b) scope of work performed by the Sanctions Legal Advisor, and (c) basis and assumption on which the legal memorandum in respect of International Sanctions issued by the Sanctions Legal Advisor is founded;	N/A

	(iii) obtained and reviewed due diligence documents regarding competency and the experience of the Sanctions Legal Advisor, including but not limited to: (a) the Sanctions Legal Advisor’s engagement letter; (b) the Sanctions Legal Advisor’s practicing certificate to be admitted to practice as an attorney and counselor of the Supreme Court and all other courts of the State of Kansas and certificate of good standing; (c) the list of deals where the Sanctions Legal Advisor advised on economic sanctions and export controls; (d) the professional recognitions received by the Sanctions Legal Advisor, such as Legal 500 “Recommended Lawyer” (2023 & 2024) and “Key Lawyer” (2023 & 2024) and a certified member of Association of Certified Sanctions Specialists; (e) the publications authored by the Sanctions Legal Advisor, such as <i>Florida Bar Association: “Doing Business in China” for the “International Law Deskbook 2026”</i> (including a sub-chapter on U.S.-China sanctions and export control), <i>Understanding U.S. Secondary Sanctions & the Legal Implications to your Company’s Global Business</i>, <i>U.S. Sanctions in the Russia-Ukraine Conflict: An Overview of the Purpose, Scope & Effect</i>, and <i>Secondary Sanctions: Relevant Case Study and Company Coping Mechanisms to Assess & Mitigate Sanction Risk</i>; and (f) the arbitrator qualifications with trade law specialty received by the Sanctions Legal Advisor by several arbitration courts, such as South China International Economic and Trade Arbitration Commission, Shenzhen Court of International Arbitration and Shanghai International Economic & Trade Arbitration Commission; and (iv) obtained and reviewed the signed confirmations issued by the Sanctions Legal Advisor on (a) no material change is expected to be made on its opinion in the Application Proof, and (b) the independence of the Sanctions Legal Advisor, respectively.	
4.	Summary. Please:	
(i)	disclose upfront the meaning of “digital human agent”, “GJ AI workforces”, “carbon-based human workforces”, “silicon-based workforces”, “AI Copilot” and “AI Autopilot” (pages 1 and 2);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	1

(ii)	disclose the reason(s) for the fluctuations in the Group’s gross profit margin and net loss during the Track Record Period; and, with reference to the consolidated statements of changes in equity on pages I-8 and I-9, elaborate on the reason(s) for the fluctuations in net (liabilities)/assets during the Track Record Period (pages 13 and 14); and whether the Company has a fixed dividend policy (pages 19 and 286);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	8, 14, 236
(iii)	briefly elaborate on the intended use of the net proceeds (page 20); disclose quantitative and/or qualitative information on the Group’s financial performance and operations after the Track Record Period under the “Recent Developments” subsection (page 18); and in a separate subsection in the “Summary” section, discuss key recent regulatory changes (in particular, the relevant AI-related laws and regulations in the PRC) and their impact on the Group’s business operations and financial performance, if appropriate.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	13, 15
5.	Risk Factors. Please:	
(i)	remove <u>all</u> mitigating statements throughout this section. Non-exhaustive example includes “[a]lthough we did not record any write-down of inventories during the Track Record Period...” (page 46);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	36, 39, 45, 48
(ii)	remove the risk factor “[f]ailure to respond to developments in the legal system may subject our business and financial performance to risks” as a listing applicant is expected to be compliant with laws and regulations (page 65); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	53
(iii)	amend the statement as underlined: “ <i>Certain facts, forecasts and statistics contained in this prospectus are derived from various official <u>government</u> sources and may not be complete or up to date</i> ” (page 70).	
	Please refer to the revised disclosure in the Post Application 1st Proof.	56
6.	Industry Overview. Please:	
(i)	advise, with reference to Chapter 3.4 of the Guide for New Listing Applicants (the “ Guide ”) and Practice Note 21 of the Main Board Rules, details of the due diligence performed by the Sponsors to verify the validity of the disclosure in relation to competitive landscape and the Group’s market positions, including the methodology adopted by the Industry Consultant in determining the overall market size of the industry in which the Company operates and the number of market players therein; identifying the top market players and how their background information and financial/ operating data	

	were obtained, and the reasonableness of major assumptions adopted; and projecting growth rates for each relevant market;	
	Determining the overall market size of the industry in which the Company operates and the number of market players in that industry In order to determine the overall market size of the digital human agent industry and the number of market participants therein, the Industry Consultant has taken several actions including: (i) conducted interviews with the management of the Company as well as experts and other market players to have a general picture of the industry and performance of market players. These key industry experts have been serving at the leading digital human agent solutions market in China with many years of working experience, and have a deep industry understanding of the digital human agent solutions industry in China; (ii) conducted market research by examining the sources of market information from public source, internal database as well as desktop research; and (iii) analyzed the market data obtained and designed a formula to estimate the overall market size with the imputation of appropriate market data and factors. The Industry Consultant primarily adopted a demand-side approach to estimate the market size in terms of revenue generated from digital human agent solutions. Major application scenarios were identified, including financial services, entertainment, public services, healthcare, education and retail. Within each scenario, further sub-segmentation was conducted to reflect different demand characteristics (for example, financial services were further segmented into banking, insurance and securities). In this regard, the Industry Consultant specifically designed formulae below in which such market data are imputed: The revenue generated from digital human agent solutions = (Number Of Institutions/Enterprises Within Each Scenario × Digital Human Agent Solution Penetration Rate In Each Scenario Of The Year – Prior Year Installed Base) × Average Annual Spending Per Institutions/Enterprises Among these, Prior Year Installed Base refers to the cumulative number of enterprise customers that had already adopted digital human agent solutions as of the end of the previous year, which is deducted to avoid double counting of existing users. Historical total number of institutions/enterprises (as the customers) in each scenario are derived from the State Administration for Market Regulation, National Economic Census Yearbook and internal databases. The historical average annual spending per institution/enterprise was derived based on interviews with industry experts.	N/A

In addition, the historical market size was cross-checked against the aggregate revenue scale of major market participants from the supply side, taking into account the relatively high market concentration. The top five market participants of this market collectively accounts for over half of the total market size in terms of revenue in 2024, while the remaining market participants are generally smaller in scale and contribute a relatively fragmented share of the market.

The forecasted total number of customers, the penetration rate of digital human agent solutions, and the average spending on digital human agent solutions per customer are based on interviews conducted with over 10 experienced industry experts.

From the supply side, there are hundreds of companies providing digital human agent solutions in China. As there is no publicly available data on the total number of market participants in the digital human agent industry, the Industry Consultant conducted primary research, including interviews with key industry experts who have extensive experience in leading digital human agent and AI-related companies and possess in-depth industry knowledge. Based on insights obtained from such interviews, the Industry Consultant derived estimates on the number of market participants and the overall market structure. The information obtained from different experts was further cross-checked and validated against other available sources, including company disclosures, public records and market observations, to ensure consistency and reliability of the estimates.

Identifying the top market players and how these players’ background information and financial/ operating data were obtained

It is respectfully submitted that the identities of the market players referred to in the Industry Overview section are as follows:

Company A	Alibaba Cloud Computing Co., Ltd. (阿里云计算有限公司)
Company B	Tencent Holdings Limited (腾讯控股有限公司)
Company C	ByteDance Ltd. (北京抖音信息服务有限公司)
Company D	iFLYTEK Co., Ltd. (科大讯飞股份有限公司)
Company E	Synthesia
Company F	Soul Machines
Company G	HeyGen

	Company H	Xiaoice Co., Ltd. (北京红棉小冰科技有限公司)
	Company I	Mobvoi Information Technology Co., Ltd. (出门问问信息科技有限公司)
	Company J	MoreFun Technology Co., Ltd. (魔法科技有限公司)
	Company K	Baidu Online Network Technology Co., Ltd. (百度在线网络技术有限公司)
	Company L	Huawei Cloud Computing Technologies Co., Ltd. (华为云计算技术有限公司)
The Industry Consultant obtained the market players' background information from their official websites, financial reports, and National Enterprise Credit Information Publicity System. As there is no publicly available data on the ranking or financial/ operating data of global and China's digital human agent market, the Industry Consultant's research methodology for the top market players, and their financial/operating data, were based on the collection of market intelligence from private channels instead of the public source. Its research methodology on the top market players is as follows: (i) examining the proprietary expert network: the Industry Consultant has established an expert network, with over 300,000 industry experts and covering various industries such as TMT, finance, real estate, healthcare, and consumer goods. The Industry Consultant first examined its proprietary expert network and selected the expert candidates based on the basic personal information of the experts, such as their working experience and expertise; (ii) compiling and sending questionnaire to the expert candidates: the Industry Consultant then compiled a questionnaire comprising questions relating to the digital human agent industry for the preparation of the market research and sent the said questionnaire to the expert candidates as preliminary communication so as to ascertain whether the expert candidates would provide the request market information; (iii) conducting interviews with the appropriate experts: After reviewing the replies from the expert candidates, the Industry Consultant made appointments and conducted interviews with 10 appropriate experts who were expected to be capable of providing the useful market intelligence of the top market players (including Alibaba Cloud, iFLYTEK, Xiaoice, MoreFun, Mobvoi, etc), which primarily included their business background, operation scale, estimated revenue as well as market overview. Key industry experts, with whom the Industry Consultant has conducted interviews, were all senior-level people such as the vice president, sales director, regional director, marketing director, operating manager, and product deputy director, who have been serving at leading digital human agent and AI companies in China with many years of working experience and have insightful industry understanding. In the interviews, experts provided financial data and		

	operating data regarding other market players primarily based on phone inquiries or inquiries from peers in the industry. Since the experts chosen in the above manner had sufficient experience and networks in the digital human agent industry, the Industry Consultant considered it a robust method to obtain information about private companies in the industry; and (iv) cross checking the information obtained from different experts: the Industry Consultant would examine the quality of the information on the private industry players so obtained from the market experts by cross checking the information obtained from the different market experts. The Industry Consultant would further contact the experts to clarify the information should inconsistency or uncertainty be found from the cross-checking. Major assumptions adopted The Industry Consultant made the estimation of the overall size of the China’s digital human agent market based on assumptions, including: (i) the overall social, economic, and political environment in China is expected to remain stable during the forecast period, (ii) the Chinese economy is expected to grow steadily during the forecast period, and (iii) there will be no extreme unforeseen events, including regulations and government policies, which may materially affect the market during the forecast period. In respect of identifying the top market players in global and China’s digital human agent market, respectively, the Industry Consultant has based on assumptions including but not limited to that their products and business models are comparable and they are exposed to similar extent of macro-economic factors and industry outlook. Methodology for Projecting Growth Rates The Industry Consultant projects the growth rates of the digital human agent market by integrated the demand side and the supply side. From the supply side, the Industry Consultant conducted interviews with the Company’s management, industry experts, and other market players, and identified their future product focus areas and strategic priorities. In addition, the Industry Consultant assessed the demand conditions for digital human agent solutions and the expected budget allocation for digital transformation across different application scenarios, with reference to publicly available information and insights obtained from expert interviews. The supply-side intelligence was cross-checked against the demand-side projections to ensure consistency. The combined outlook was then reviewed	
--	--	--

	with multiple industry experts to confirm its reasonableness and minimize single-source bias. <u>Joint Sponsors’ Due Diligence</u> The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to cast doubt on the validity of the disclosure in relation to competitive landscape and the Group’s market positions: (i) obtained and reviewed the Industry Report, including the methodology, assumptions and data sources adopted or used by CIC; (ii) conducted expert due diligence interview with CIC and understand, among others, (a) the background, qualifications, professional experience and independence of CIC, (b) scope of work performed by CIC, (c) internal quality control procedures of CIC, (d) that the methodology adopted by CIC in the competitive landscape and market position study is aligned with industry practice, (e) the reasonableness of the major assumptions adopted by CIC, and (f) the principal risks affecting the accuracy of the industry disclosures in the Post Application 1st Proof and the approach adopted by CIC to minimize such risks; (iii) obtained and reviewed the factual information on which CIC relied and the sources on which CIC’s opinion was based; (iv) obtained and reviewed the representations made by the Group to CIC in connection with the listing application to the Stock Exchange, which are consistent with the Joint Sponsors’ knowledge of the Group and its business; (v) obtained and reviewed the underlying documents of calculation of projecting growth rates for each relevant market; and (vi) obtained and reviewed the signed confirmations issued by CIC on (a) no material change is expected to be made on its opinion in the Application Proof, and (b) the independence of CIC, respectively.	
(ii)	disclose, with support of the Industry Consultant’s view and basis, whether the “ <i>digital human agent</i> ” industry actually exists and development roadmap for the digital human agent industry in the PRC “ <i>proposed</i> ” by the Group is commonly adopted by the industry players given that there are only limited relevant public information based on our desktop searches (e.g. pages 2, 90, 135, 136 and other relevant pages);	
	Please refer to the revised disclosure in the Post Application 1st Proof. Whether the “Digital Human Agent” Industry Actually Exists	68, 70

	The Company respectfully submits that the “digital human agent” industry is a well-established and functioning market, underpinned by (i) clearly defined product offerings, (ii) explicit national strategies and top-level policy design, and (iii) genuine market demand and commercialized use cases, as confirmed by CIC. 1) Clearly Defined Product Offerings Leading technology companies have positioned digital human agents as platform-level products, committing to sustained, long-term investment and iteration. Beyond this, digital human agents have evolved from early-stage, fixed-avatar broadcast tools to highly realistic, interactive, and mobile intelligent agents by 2025, with product offerings rapidly advancing toward greater intelligence and deeper integration. Set out below is an overview of the product strategies adopted by selected leading solution providers. Company A: • In 2023, Company A launched <i>Live Portrait</i>, a digital human agent video generation tool built on its Alibaba Cloud. By inputting a photo and audio, the tool generates a talking-head video with lip movements synchronized to speech. The product is primarily used in enterprise marketing, educational content, and short-form video production. • In early 2025, following an upgrade to the Alibaba Cloud, the platform enabled direct text-to-video generation. In the same year, Company A further enhanced its model to learn and replicate specific human likenesses, allowing consistent and coherent performances across new scripts. This capability supports use cases with high character consistency requirements, such as branded advertising series, AI short dramas, and interactive narrative content. Company I: • In March 2022, Company I launched <i>Qimiaoyuan</i>, a digital human agent video generation platform primarily designed for standardized content creation scenarios such as product introductions, brand promotion, and educational explanations. • In 2023, by integrating multimodal large models, <i>Qimiaoyuan</i> introduced capabilities such as generating a digital human agent from a single photo, significantly lowering the barrier to digital avatar creation. • In 2024, the Company strategically shifted its focus toward interaction and launched the <i>Qimiaowen</i> platform, centered on multi-round dialogues and enterprise knowledge bases. The platform enables enterprises to deploy deeply customized digital human agents	
--	--	--

as “digital employees,” expanding use cases to intelligent customer service, digital guided tours, and employee training.

- In 2025, Company I completed a key integration by combining its intelligent interaction system with mobile physical embodiments, launching the *Xiaowen Mobile Digital Human Agent*. The product is capable of autonomously delivering services in real-world offline environments such as exhibition halls and government service centers.

Company K:

- In 2023, Company K commercialized its digital human agent solutions based on the ERNIE (Wenxin Yiyan) large model, enabling digital human agents to automatically generate broadcast-style videos from text scripts and support basic real-time voice interaction.
- In 2025, Company K released seven AI-powered digital human agent employee products, each designed to perform specific functional roles such as digital sales, digital customer service, and digital training. In parallel, the Company introduced an open, real-time interactive digital human agent capable of invoking specialized knowledge bases to answer continuous and complex professional queries.

2). Explicit National Strategies and Top-level Policy Design

Over the past few years, a steady stream of policies related to digital human agents has been introduced, forming a comprehensive and coherent regulatory framework. National and local governments have incorporated digital human agents into industrial development plans, promoting their standardized application across public services, intelligent manufacturing, and other priority sectors. This well-established policy architecture strongly demonstrates that the digital human agent industry is an emerging sector cultivated under clear national strategic guidance and institutional support, with its regulatory compliance and long-term sustainability anchored in robust top-level policy design.

Policy	Issuing Authority & Date	Key Provisions Related to Digital Human Agents	Industry Impact and Significance
Information Technology – General Technical Requirements for Customer Service-Oriented	State Administration for Market Regulation (SAMR) Nov.2025	China’s first national standard dedicated to digital human agents. It systematically	Provides authoritative technical benchmarks for R&D, testing, and deployment,

	Virtual Digital Humans (GB/T 46483-2025)		defines technical specifications and performance requirements for customer service-oriented virtual digital human agents, covering 2D/3D avatar generation and driving, as well as visual, voice, and emotional interaction capabilities (e.g., response latency, comprehension accuracy).	marking the industry's transition from fragmented, ad-hoc development to standardized, high-quality growth. It addresses long-standing issues of uneven technology maturity and inconsistent service quality.	
	Interim Measures for the Administration of Anthropomorphic AI Interaction Services (Draft for Public Consultation)	Cyberspace Administration of China (CAC) Dec.2025	Establishes a dedicated regulatory framework for digital human agents. Key requirements include prominent disclosure of AI identity, implementation of anti-addiction mechanisms, strengthened content safety governance, and enhanced protection for minors.	Defines clear safety and ethical boundaries for frontier AI applications, marking the industry's transition into a phase of regulated and orderly development. While mitigating potential risks, the Measures provide foundational institutional safeguards for the compliant and sustainable growth of qualified market participants.	

	Administrative Provisions on Deep Synthesis of Internet Information Services	Cyberspace Administration of China (CAC), MIIT, Ministry of Public Security Dec.2022	Brings technologies used to generate or edit digital human agents—such as facial generation, 3D reconstruction, and digital simulation —under the regulatory scope of “deep synthesis.” Requires clear labeling of synthesized content and the fulfillment of corresponding security and compliance obligations.	Establishes the foundational regulatory framework governing digital human agent technologies. While encouraging innovation, it sets early compliance boundaries and provides a baseline institutional structure to support the industry’s long-term development.	
	Beijing Action Plan for Promoting Innovation and Development of the Digital Human Industry (2022–2025)	Beijing Municipal Bureau of Economy and Information Technology Aug.2022	China’s first dedicated policy initiative targeting the digital human industry . Sets quantitative targets, including achieving an industry scale exceeding RMB50 billion by 2025, and promotes innovation through technology platforms, benchmark applications (e.g., culture and tourism, finance, government services), and industrial clusters in districts such as	Sends a strong and explicit signal of policy support. The Plan serves as a national reference model, significantly boosting market confidence and guiding industrial clustering and ecosystem development.	

	Tongzhou and Shijingshan. 3). Genuine Market Demand and Commercialized Use Cases The market demand for digital human agents is rooted in tangible efficiency gains and experience upgrades across the real economy. In retail and financial services, their value is directly reflected in cost reduction, productivity improvement, and revenue growth. In government and healthcare, digital human agents primarily enhance service accessibility and public inclusiveness. In education and cultural entertainment, they are driving content innovation and structural changes in delivery models. The large-scale, verifiable deployments across the six key sectors below collectively demonstrate that demand for digital human agents is not conceptual, but already embedded in closed-loop, value-generating commercial reality. Retail: • By the end of 2025, more than 10,000 merchants at Yiwu International Trade City had adopted digital human agents to automatically convert Chinese product videos into marketing content in 36 languages, generating new overseas inquiries and orders. • Multiple beauty, skincare, and apparel brands have deployed digital human agents for live streaming and brand marketing, including Florasis, Watsons, Carslan, and Anta, among others. Financial Services: • By 2025, over ten large commercial banks, including major state-owned banks and nationwide joint-stock banks, had deployed digital human agents with visual embodiments at scale across customer service and remote banking scenarios. Government Services: • Wuxi City launched a “24/7 digital human agent matrix,” now applied across more than 20 government service scenarios, delivering intelligent consultation and process guidance to support the development of a “non-stop” digital government. • Ningbo Haishu District deployed an AI-powered digital human agent across 59 service points, covering 68 self-service terminals. The system replaces traditional manual consultation with voice interaction and multimodal digital avatars, advancing government services from "capable of handling" to "efficient and intelligent handling," with services including social security inquiries, certificate printing, and household registration processing.	
--	--	--

	Education: • In 2025, multiple primary and secondary schools in Hangzhou introduced digital human agent teaching assistants in AI literacy courses. Teachers generate their own digital counterparts to deliver core concepts, while focusing personally on classroom interaction, forming an efficient “intelligent dual-teacher” model. • In the same year, No. 15 Primary School in Wuhan, a national pilot school for AI education, developed two digital human agents—“Keke” and “Yiyi”—to serve as campus culture guides. Healthcare: • West China Second University Hospital of Sichuan University officially launched the “Huaxi Women and Children Digital Doctor,” a digital human agent replicating clinicians’ reasoning processes through large models, capable of pre-consultation, medical record structuring, and preliminary diagnostic recommendations. • Institutions such as Penglai People’s Hospital in Shandong Province have introduced digital human agents as “health education ambassadors,” producing disease prevention and wellness content distributed through official hospital media channels to improve public health awareness. Culture and Entertainment: • China Central Television and Hunan TV have respectively launched virtual hosts “AI Wangguan” and “Xiaoyang” for news broadcasting and variety programming, innovating content formats and engaging younger audiences. • The short-form drama <i>The Impostor Dragon Tamer Ji Gong</i> applies digital human agent technology to recreate the youthful likeness of 92-year-old artist You Benchang’s iconic “Ji Gong” character, enabling the continuation of a classic IP. Development Roadmap For The Digital Human Agent Industry It is respectfully submitted that the development roadmap for the digital human agent industry as set out in the Prospectus does not represent a novel or isolated framework proposed by the Group. Rather, it is consistent with, and reflective of, the broader evolutionary trajectory of the artificial intelligence industry. This trajectory follows a well-established progression: from “tools” to “autonomous agents,” from “pre-programmed execution” to “adaptive interaction with complex environments,” and from “single-function systems” to “collaborative and swarm-based intelligence.” This staged evolution closely parallels the development path of autonomous driving, one of the most advanced and mature applications of artificial	
--	--	--

	intelligence. In 2014, the Society of Automotive Engineers (SAE) introduced the J3016 standard, which defined Levels 1 to 5 of driving automation to provide a common, structured framework for assessing system capabilities and maturity. As artificial intelligence technologies have continued to advance, similar tiered classification frameworks have been increasingly adopted across multiple AI sub-sectors, including: • Humanoid Robotics (May 2025): Led by the Beijing Humanoid Robot Innovation Center, the world’s first “Humanoid Robot Intelligence Grading” framework was introduced, adopting a “four dimensions, five levels” (L1–L5) evaluation model. • AI Agents (August 2025): At the ISC.AI conference, Mr. Zhou Hongyi, Chairman of 360 Group, proposed a five-level evolutionary model specifically for AI agents. While tailored to the specific characteristics of each domain, these “five-level” evolutionary frameworks are underpinned by a consistent core logic: an initial stage characterized by human-controlled tools (Levels 1 and 2), followed by a critical transition to human–machine collaboration (Level 3), and ultimately progressing toward higher degrees of machine autonomy and coordinated, swarm-based intelligence (Levels 4 and 5). For ease of reference, <u>Schedule I</u> provides a detailed side-by-side comparison of the staged development roadmaps for Digital Human Agents, Autonomous Driving, Humanoid Robotics, and AI Agents. Furthermore, leading industry participants, such as Company K, have publicly articulated comparable digital human agent development roadmaps at Baidu World 2025, underscoring that this phased evolution represents a widely recognized industry trajectory rather than an approach unique to the Group.	
(iii)	provide a concise analysis of the current market size of the global and PRC AI industry and specify the proportion attributable to the digital human agent segment; disclose a brief overview of the global digital human agent industry during 2021 to 2030E; and highlight specific drivers that are relevant to the Group’s service offerings as the current disclosure is overly generic (pages 89 to 96);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	67, 70, 71
(iv)	highlight the number of players in the PRC and global digital human agent industries; for each of the market ranking analysis, disclose ranking of the <u>top 10</u> players, and, in tabular format, a comparison analysis on the Group’s key products against those of its peers (e.g. market positioning, average selling price, performance, development stages (i.e. L1 to L5), application scenarios) (pages 96 and 97); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	74, 75

(v)	disclose an analysis on the historical and projected price of the Group's key cost of sales with a commentary on any material fluctuations, and where material, highlight the relevant risks in the "Risk Factors" section.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	35, 75, 76
7.	Regulatory Overview. Please include details of relevant laws and regulations regarding the digital human agent industry in the PRC, if appropriate.	
	Regarding the digital human agent industry, the PRC does not yet have a unified national law. Instead, the relevant business is regulated and governed by a multi-tiered regulatory framework that intersects several key legal domains, including the <i>Interim Measures for the Administration of Generative Artificial Intelligence Services</i> (《生成式人工智能服務管理暫行辦法》), the <i>Administrative Provisions on Internet Information Service Algorithm Recommendation</i> (《互聯網信息服務算法推薦管理規定》), the <i>Administrative Provisions on Deep Synthesis of Internet Information Services</i> (《互聯網信息服務深度合成管理規定》), the <i>Cybersecurity Law</i> (《網絡安全法》), the <i>Data Security Law</i> (《數據安全法》), and the <i>Regulation on Network Data Security Management</i> (《網絡數據安全管理條例》), among others. These regulations have already been disclosed in the "Regulatory Overview" section of the Post Application 1st Proof.	N/A
8.	History, Development and Corporate Structure. Please:	
(i)	elaborate on how the Group's donation of its GJ AI Real-time Voice Agent Platform made contribution to the fight against the COVID-19 pandemic (page 120);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	91
	disclose the principal business of Nanjing Wanrui (instead of merely stating "valued-added telecommunication services"); the basis and amount of consideration in relation to the disposal of Nanjing Wanrui; details on the transferee's relationship with the Group; and whether such disposal has been properly and legally completed and settled, <u>and all applicable regulatory approvals have been obtained</u> (if applicable) (pages 123);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	95
(ii)	disclose the shareholding details of the Pre-IPO Investors, including identities of their general partners and limited partners owning 30% or more of the partnership interests and their respective UBOs (if any) (pages 126 to 129);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	99, 100, 101
(iii)	in relation to the special rights of the Pre-IPO Investors (pages 126, I-58 and other applicable pages):	

	(a) <i>Rights granted by the Company</i> – revisit and confirm whether the termination date of the relevant redemption rights was 29 November 2024 or 30 November 2024; and	
	The Company respectfully submits that the termination date of the redemption rights granted by the Company was November 29, 2024. Please refer to the revised disclosure in the Post Application 1st Proof.	I-50
	(b) <i>Rights granted by the Controlling Shareholders</i> - in case where the redemption rights are granted by the Controlling Shareholders in which the Company is not a party to the agreement, (1) disclose whether there is any side agreement, and (2) highlight that, considering the Company is not a party to the agreement, no liability regarding such rights was recorded during the Track Record Period, where appropriate.	
	The Company respectfully submits that the Company is a party to the agreement where the redemption rights are granted by the Controlling Shareholders, and there is no side agreement in relation to such redemption rights. No financial liability regarding the redemption rights granted by the Controlling Shareholders was recorded considering (i) the Company does not have any obligation to fulfil such rights, and (ii) the Company has not provided any guarantee for such rights in the event of a default by the Controlling Shareholders. Please refer to the revised disclosure in the Post Application 1st Proof.	I-50
	Please also submit details of the Sponsors' and Reporting Accountants' due diligence in relation to such rights; and	
	<u>Joint Sponsors' Due Diligence</u> The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to cast doubt on the redemption rights granted to the Pre-IPO Investors: (i) obtained and reviewed the investment agreements for each round of the Pre-IPO Investments and the supplemental agreement in relation to termination of the special rights granted to the Pre-IPO Investors; (ii) obtained and reviewed the PRC Legal Opinion to understand, among others, the special rights granted to the Pre-IPO Investors and termination of such rights; (iii) discussed with the management of the Company and understand that all the special rights (including redemption rights) granted to the Pre-IPO Investors by the Company or the Single Largest Shareholder Group have been terminated or will be terminated upon the Listing as disclosed in the Post Application 1st Proof, and there is no side agreement in this regard;	N/A

	(iv) obtained and reviewed the executed written responses to the due diligence questionnaire from Mr. Sima Huapeng, a member of the Single Largest Shareholder Group, and understand that all the special rights (including redemption rights) granted to the Pre-IPO Investors by the Single Largest Shareholder Group have been terminated or will be terminated upon the Listing as disclosed in the Post Application 1st Proof, and there is no side agreement in this regard; (v) conducted due diligence interviews with the Pre-IPO Investors to understand, among others, details of the Pre-IPO Investments; and (vi) discussed with the Reporting Accountants and understand that they performed procedures on the Historical Financial Information (as defined in the Accountants' Report) as a whole in accordance with HKSIR 200 "Accountants' Reports on Historical Financial Information in Investment Circulars" issued by the HKICPA. Based on the work performed so far, and subject to the completion of certain outstanding matters as highlighted in the Reporting Accountants' confirmation submitted herewith, no significant adjustment is expected to be made to the draft Accountants' Report. <u>Reporting Accountants' work on redemption rights</u> It is respectfully submitted that the Reporting Accountants have conducted their work on the Historical Financial Information (as defined in Appendix I to the draft prospectus) in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 "Accountants' Reports on Historical Financial Information in Investment Circulars" ("HKSIR 200") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). Pursuant to HKSIR 200, the Reporting Accountants have planned and performed their work to obtain reasonable assurance as to whether the Historical Financial Information is free from material misstatement as a whole. As part of the Reporting Accountants' work on the Historical Financial Information, the procedures performed in relation to the redemption liabilities included, but was not limited to, the following: 1. obtaining and reading all the shareholders' investment agreements and Article of Association of the Company provided by the management of the Company; 2. obtaining and reading the minutes of the meetings of board of directors and shareholders held during the Track Record Period; 3. Requesting the management to represent that, the Company provided all agreements between the Company and the shareholders, and the Company was not obliged to any clauses under the redemption rights granted to the Series Pre-A, Series A, Series A+, A++, Series B+ and Series C investors and did not provide any guarantee on the redemption rights granted to the abovementioned investors.	
--	--	--

	Based on the aforementioned procedures performed, subject to satisfactory completion of relevant outstanding matters as highlighted in the Reporting Accountants' confirmation dated April 10, 2026, the Reporting Accountants are of the view that no significant adjustment is expected to be made to the draft Accountants' Report on the Historical Financial Information included in the draft prospectus.	
(iv)	disclose, with reference to Chapter 3.6 of the Guide, the minimum prescribed public float percentage applicable to the class of securities new to listing under different circumstances (e.g. if the offer price is fixed at the bottom end, mid-point or top end of the offer price range) (page 130).	
	Please refer to the revised disclosure in the Post Application 1st Proof.	102
9.	Business. Please:	
(i)	Business overview – for each of the Group's AI workforce solutions, disclose the average time required to complete a deployment cycle (i.e. from entering into contracts with customers to completing delivery of solutions) (page 160);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	128
	further elaborate on the pricing policy of the Group's service offerings as the current disclosure is <u>overly generic</u> , and discuss the reason(s) for the wide price range (i.e. RMB5,500 to RMB25,000) (page 161);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	130, 131, 132
	highlight, with support of the Industry Consultant's view, whether it is a common practise for industry participants to describe a customer who contributes revenue of over RMB1.0 million in a given year as a " <i>large-scale customer</i> ", and revise relevant description to a more appropriate term such as key account customer (e.g. pages 178, 179 and other applicable pages); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	147 and throughout the Post Application 1st Proof
	further elaborate on how the Group has secured its first-mover advantage in the PRC digital human agent industry, and disclose in the "Summary", "Business" and "Financial Information" sections, breakdowns of the Group's revenue by type of deployment (e.g. localised deployment, cloud-based deployment), by type of digital human agent (e.g. native digital human agent and IP digital human agent) and by customers' industry verticals;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	4, 109, 135, 211
(ii)	Solutions – elaborate on the Group's competitive edges over its peers given that its peers are technology conglomerates (including Alibaba Cloud Computing Co., Ltd. and Tencent Holdings Limited);	

	Please refer to the revised disclosure in the Post Application 1st Proof.	121
	explain how the Group’s GJ AI Real-time Voice Agent could “ <i>automatically [track] and [record] call content for analysis and compliance</i> ” (page 152);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	121, 122
	substantiate the following statements: “ <i>GJ AI workforce solutions help customers <u>significantly reduce</u> expenditure on serving their users, content creation and marketing, while <u>boosting operational efficiency and enabling innovative customer experiences</u></i> ” (pages 1 and 135);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	107
	“ <i>As a pioneer in the digital human agent industry in China, we...</i> ”, “ <i>As a <u>pioneer</u> in successfully achieving commercialization in the digital human agent market in China since 2017, we...</i> ” and “ <i>As a <u>pioneer</u> among domestic digital human agent providers to introduce</i> ” (pages 2, 136, 138, 158 and 164);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	1, 107, 110, 136
	“ <i>Driven by renowned IPs’ high recognition as well as their rich background information, AI-empowered content achieves <u>greater audience engagement and emotional resonance</u></i> ” (pages 6 and 167);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	126
	“ <i>we have built an <u>industry-leading, full-stack technologies architecture</u> that spans underlying algorithms, core models and application-layer solutions</i> ” and “ <i>Compared to competitors relying on externally assembled technology modules, our closed-loop approach delivers the following <u>distinct advantages</u></i> ” (page 140);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	111
	“ <i>our pilot program in South Korea has received <u>positive market feedback</u></i> ” (page 142); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	113
	“ <i>Observing the rising needs from an aging society ...demonstrating the <u>significant potential</u> of our solutions in the <u>social good domain</u>.</i> ”	
	Please refer to the revised disclosure in the Post Application 1st Proof.	113, 114
	As Japan continues to face demographic aging, such digital immortality services <u>hold substantial market potential</u> ” (page 143);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	114

(iii)	Customers and suppliers – disclose the gross profit margin derived from the sales to each of the overlapping customers-suppliers and how the gross profit margin compared with the Group’s overall gross profit margin during the Track Record Period (pages 185 to 187);	
	The Company respectfully submits that it has supplemented the disclosures on the gross profit margin derived from Customer A. Please refer to the revised disclosure in the Post Application 1st Proof. With respect to the remaining two overlapping customers-suppliers, namely Customer E and Supplier A, as disclosed on page 156 of the Post Application 1st Proof, the Company’s offerings to them during the Track Record Period cover GJ AI Video Generation Agent and GJ AI Live Streaming Agent, among others. It is not practicable to present the Company’s gross profit margin derived from its sales to them, mainly because the Company’s GJ AI Video Generation Agent and GJ AI Live Streaming Agent delivered through cloud-based deployment share a large portion of common costs, primarily including costs of cloud services. It is not feasible to accurately allocate such costs among different customers.	156, 157
(iv)	Third-party Payment Arrangements – disclose the amount of unsettled payment under the Third-party Payment Arrangements (if any), as well as the expected settlement timeline; prominently highlight whether the Group had had any material disputes and/or received refund requests in relation to the Third-party Payment Arrangements during the Track Record Period and up to the Latest Practicable Date and the Group had obtained any confirmations from the Relevant Customers and the Third-party payors on this regard;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	158, 159
	highlight when exactly the Group ceased to accept payment under the Third-party Payment Arrangements; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	158
	further elaborate on the internal control measures adopted to prevent recurrence of the Third-party Payment Arrangements (pages 188 and 189);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	159
(v)	Privacy and data security – discuss whether the Group obtains consents from its customers in applying the customers’ IPs in provision of its solutions;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	164
	whether the Group’s business operations involve cross-border data transmission and if so, the Group’s compliance with the relevant laws and regulations; and	

	The Company respectfully submits that as of the Latest Practicable Date, the Group is not, in the course of its daily business operations, involved in any cross-border transfer of identified core data or identified important data as explicitly defined by the laws and regulations of China or users' personal data that are collected and stored within the territory of China.	N/A
	prominently highlight, with support of legal advisors' view, whether the Group is required to conduct a cybersecurity review pursuant to the Cybersecurity Review Measures, and whether the Group had complied with all applicable AI-related laws and regulations during the Track Record Period and up to the Latest Practicable Date (pages 195 to 197);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	162, 164
(vi)	<i>Social insurance and housing provident funds</i> – disclose details on the Group's failure to make sufficient contribution to social insurance and housing provident funds, including the reason(s) for such non-compliance, the possible consequences, rectification timeline and enhanced internal control measures (page 200); and,	
	Please refer to the revised disclosure in the Post Application 1st Proof.	166, 167
	with support of the PRC Legal Advisor's view, the impact of the Interpretation II by the Supreme People's Court of the PRC on Legal Issues in the Trial of Labor Dispute Cases 1 on the Group and its compliance with the relevant laws and regulations (including whether any provisions should be made and quantify the maximum exposure of the Group, with support of the Reporting Accountants' view and basis thereof), and enhance the disclosure in the "Risk Factors" and "Regulatory Overview" sections as appropriate;	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company respectfully submits that the Reporting Accountants have conducted their work in accordance with HKSIR 200 issued by HKICPA to express an opinion on the Historical Financial Information as a whole. This standard requires that the Reporting Accountants plan and perform their work to obtain reasonable assurance about whether the Historical Financial Information as a whole is free from material misstatement. As part of their work on the Historical Financial Information, the Reporting Accountants have considered the adequacy of the provision for social insurance in the event of any shortfall in contributions. Based on the procedures performed and subject to the outstanding matters set out in the Reporting Accountants' confirmation dated April 10, 2026, no significant adjustments are expected to be made to the draft Accountants' Report. Having considered the legal opinion issued by the PRC Legal Advisors and discussed with the Reporting Accountants, the Directors of the Company are of the view that no provision is required for the shortfall in social insurance contributions, as an outflow of economic benefits is remote.	42, 84, 85

(vii)	<i>Licenses, permits and certificates</i> – disclose the legal advisors’ view on whether all material requisite licences, permits and approvals obtained by the Group had remained in full effect during the Track Record Period and up to the Latest Practicable Date, and whether there is any legal impediment in renewal of the expiring licences, permits and approvals (page 201); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	167
	highlight, where appropriate, whether the Group is required to obtain any licence, permit or approval in relation to its service offerings that involve “ <i>AI physicians</i> ” (who simulate physicians’ medical consultations to provide <u>health advice</u>) and if so, details of the relevant licence, permit or approval;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	110
(viii)	<i>Environmental, social and governance (“ESG”)</i> – enhance the ESG disclosure and in accordance with Chapter 4.3 of the Guide (e.g. pages 202 to 207), in particular, details on the scope 1, scope 2 and scope 3 greenhouse gas emissions during the Track Record Period and how the Group would control greenhouse gas emissions; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	169
	the Group’s measures to ensure ethical use of its AI products and technologies; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	170
(ix)	<i>Others</i> – disclose, <u>during the Track Record Period and up to the Latest Practicable Date</u> , whether the Group had been a party to any ongoing material litigation, arbitration or administrative proceedings, and whether the Group had complied with the applicable regulatory filing procedures (e.g. filing with CAC), laws and regulations in relation to its business in all material respects (pages 17, 196 and 210);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	163, 176
	disclose whether any material deficiency was identified during the Internal Control Review and if so, details of relevant deficiency and enhanced internal controls implemented (pages 211 and 212); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	176
	disclose, under a separate subsection in the “Business” section, the impact of the COVID-19 pandemic on the Group’s business operations and financial performance during the Track Record Period, with support of quantitative and qualitative information.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	177

10.	Financial Information and Accountants' Report. The current disclosure on the trend of the Group's financial performance and results of operations is overly generic. Please enhance the disclosure to provide more meaningful explanations on material fluctuations of, and the underlying reasons for, each of the major components of the Group's financial results, financial position and cash flows during the Track Record Period, and address the following:	
(i)	disclose the Group's measures to manage its cashflow mismatch, given that the Group's inventory turnover days and trade receivable turnover days together were longer than its trade payable turnover days;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	225
	explain why the " <i>contracts with large-scale customers typically do not explicitly specify credit terms</i> " and, with support of the Industry Consultant's view, whether such arrangement is a common commercial practice; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	144
	disclose a separate risk factor in relation to cashflow mismatch and prolonged cash conversion cycle in the "Risk Factors" section, if appropriate;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	38
(ii)	disclose the amounts and percentages of subsequent certification of contract assets, subsequent settlement of prepayments, deposits and other receivables, other payables and accruals and subsequent recognition of contract liabilities as revenue;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	222, 226, 228
	and whether there is any impairment issue regarding inventories in view of the low subsequent utilisation (pages 266, 267, 270 and 273);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	223
(iii)	disclose, with reference to page 283, the Group will settle all amounts due from related parties in non-trade nature before the Listing (page I-71);	
	Please refer to the updated disclosure in the Post Application 1st Proof.	I-62
	include a definite statement regarding whether the initial adoption of IFRS 18 would significantly affect the financial position and performance of the Group (instead of merely stating " <i>in the process of assessing the impact of the adoption</i> ") (page I-72); and	
	Please refer to the updated disclosure in the Post Application 1st Proof.	I-62

(iv)	considering the total equity as of 30 June 2025 stated in the statements of financial position of the Company was larger than the total equity as of 30 June 2025 stated in the consolidated statements of financial position, advise, with basis, whether assessment has been made to ascertain that no impairment is needed for the investment in a subsidiary during the Track Record Period (pages I-6 and I-7); and	
	It is respectfully submitted that the total equity of the Company-level balance sheet (RMB498.7 million as at 30 June 2025) being less than the total equity at the Group level (RMB580.9 million as at 30 June 2025) is primarily due to the accumulated losses recorded by subsidiaries of the Group. The Company's investment in subsidiaries represented investment in three subsidiaries, Guiji (Kunshan) Intelligence Technology Co., Ltd. (“Guiji Kunshan”), Nanjing Guixin Intelligence Technology Co., Ltd. (“Nanjing Guixin”) and Jiaxing Intelligence Technology Co., Ltd. (“Jiaxing Intelligence”) during the Track Record Period. As for the assessment made to ascertain no impairment is needed for the investment in subsidiaries on the company level for the Track Record Period, it is respectfully submitted that, the Directors has made the following assessment in accordance with IAS 36 to conclude that no impairment losses were required to be recognized for the investment in subsidiaries during the Track Record Period. At the end of each reporting period, the Directors assessed whether there is any indication that the investment in subsidiaries may be impaired. The indications of impairment, according to IAS 36.12, include both external and internal sources. After careful assessment, the Directors determined that there were indications of impairment for the investments in Guiji Kunshan and Nanjing Guixin as investment costs are higher than the net asset value of these two subsidiaries, and no indication of impairment for the investment in Jiaxing Intelligence, considering it was a newly established subsidiary. Assessment of impairment on Guiji Kunshan and Nanjing Guixin: The Directors estimated the recoverable amount of the investments in Guiji Kunshan and Nanjing Guixin based on the “value-in-use” calculation in accordance with IAS 36.20. “Value in use” was calculated by preparing discounted cash flows, and any shortfall of recoverable amount against the carrying amounts would be recognized as impairment loss. After careful assessment by the management as at December 31, 2023, December 31, 2024 and June 30, 2025, the estimated recoverable amount was higher than the carrying amount and the Directors did not make any impairment loss for the investment in these two subsidiaries during the Track Record Period. Assessment of impairment on Jiaxing Intelligence: Jiaxing Intelligence was established in April 2025 and commenced business operation in May 2025, who will mainly focus on the new GJ Autopilot AIGC Agent business. As a newly established subsidiary, it needs to invest a	N/A

	significant amount in personnel expenses as well as R&D activities with only a limited amount of revenue at its early stage and is expected to achieve the breakeven point or make profit in the future. The Directors considered that such losses were within expectation and no evidence is available from the Group's internal reporting that indicates that the economic performance of Jiaxing Intelligence is, or will be, worse than expected. Therefore, there is no indication of impairment for the investment in Jiaxing Intelligence throughout the Track Record Period. In view of the above, the Directors respectfully submitted that we made the assessment in accordance with IAS 36 to conclude that no impairment losses were required to be recognized for the investment in a subsidiary during the Track Record Period.	
(v)	disclose details of impairment testing in relation to non-financial assets (e.g. right-of-use assets, and property and equipment) in the "Financial Information" section and Accountants' Report, where appropriate.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	222
11.	Future Plans and Use of Proceeds. Please further substantiate each of the proposed uses of net IPO proceeds with enhanced disclosure in the "Business" and "Future Plans and Use of Proceeds" sections (e.g. pages 145 to 148, 289 to 291 and other relevant pages) and address the following:	
	Please refer to the revised disclosure in the Post Application 1st Proof.	238, 239, 240
(i)	Strengthen R&D capabilities – disclose the origin of the hardware products that the Group plans to procure (in particular, whether the Group plans to procure any U.S.-origin hardware products);	
	Please refer to the revised disclosure in the Post Application 1st Proof.	238
(ii)	Marketing and promotion – specify the "targeted industries" and/or overseas jurisdictions that the Group plans to expand into; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	239
(iii)	Acquisitions – disclose quantitative information on the selection criteria (e.g. business scale, financial and operational requirement, etc.) and the Industry Consultant's view, with basis, on the availability of potential targets, and the expected synergistic effects of the potential targets with the Group's current business;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	239
	the intended investment format (i.e. whether the Group plans to invest majority/minority stake, through acquisition or cooperation, etc.); and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	239

	the expected operational and financial impact on the Group (such as cost structure, profit margin, cash flow and risk profile) as a result of such investments or acquisitions.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	239, 240
12.	Market Comparable Analysis. Please substantiate the selection of the market comparables as it appears that none of the selected peers are key market players according to market ranking analysis in the “Industry Overview” section, and provide a more meaningful comparable analysis on the financial performance of the Group and its peers rather than a standalone explanation of each Company's year-on-year fluctuations.	
	It is respectfully submitted that the market players cited in the “Industry Overview” section (Alibaba Cloud, Tencent, ByteDance, iFLYTEK, Synthesia, Soul machine, HeyGen) are not suitable comparable companies to be placed in market comparable analysis due to the mismatch in financial scale and business focus: (i) Financial Scale The Group’s revenue reached RMB 656 million in 2024, while the revenue of certain market players (Alibaba Cloud, Tencent, ByteDance) exceeded RMB 100 billion. iFLYTEK’s revenue reached more than RMB 23 billion. Their financial data could not be segregated to reflect the standalone digital human agent business performance, resulting in disproportionate financial indicators that are irrelevant to the Group’s business, making them not applicable for a detailed comparison. As for overseas market players cited in the Industry Overview section, their financial data could not be retrieved since they have not been listed companies. Also, their scale and profit structures may be distorted by international pricing and local regulatory frameworks, which are incompatible with the Group’s China-focused business model. (ii) Business Focus The Group focuses on digital human agents and enterprise-level AIGC solutions, with business-client-focused private development and standardized cloud services. In contrast, some of the market players’ main business focus are not digital human agents or AIGC solutions, as they are supplementary services to their cloud computing, social, or e-commerce ecosystems. Overseas market players generally focus on individual customers or small-business users, and their products are typically delivered in a more standardized, self-service manner. Such business models differ materially from the Group’s enterprise-oriented solution model, which involves deeper deployment, customization, integration and service requirements for large-scale customers.	N/A

	The selected market comparables are well-suited for comparative analysis, as reflected in Form M111, the discrepancies in financial indicators between the Group and the comparables are not material. Additionally, their business focus aligns with the Group’s — namely a shared priority on enterprise-level AI solutions with overlapping core scenarios, as elaborated in Form M111. While the parties do not adopt identical business models, the overall operational and technical homogeneity between the Group and the comparables further enhances their relevance as valid market peers. For the updated comparable analysis on the financial performance of the Group and its peers, please refer to the revised disclosure in updated Form M111.	
13.	Unsubstantiated and Aspirational Languages. Please remove or otherwise tone down all unsubstantiated, hyperbolic, marketing, aspirational and/or misleading languages about the Group’s business and market position. Non-exhaustive examples include, “<i>innovation</i>”, “<i>innovate</i>”, “<i>innovative</i>” or “<i>innovatively</i>” or similar wordings (e.g. pages 1, 2, 5 and 135); “<i>preeminent GJ AI workforces</i>”, “<i>visionary approach to AI evolution</i>” (page 1); “<i>As the largest digital human agent provider in China, we have built a distinguished industry reputation through our proven track record</i>” (page 46); “<i>highly adaptable</i>” and “<i>highly flexible</i>” (pages 138 and 143); “<i>future-oriented matrix</i>” (page 151); and “<i>we believe we have established and maintained good working relationships with our employees</i>” (page 200).	
	Please refer to the revised disclosure in the Post Application 1st Proof.	1, 2, 5, 6, 33, 36, 39, 72, 91, 107, 108, 110, 112, 114, 115, 116, 117, 120, 121, 125, 126, 127, 133, 139, 140, 141, 142, 147, 153, 167, 178, 184, 185, 206, 207, 208, 238
14.	Prospectus Simplification and Others. Please revisit the overall drafting in the Prospectus to adopt plain and clear English, and avoid convoluted statements such as “[o]ur GJ AI Real-time Video Agents enable real-time interactive capabilities on a one-to-one mode” (page 5); remove the “Our Mission” and “Our Vision” subsections (pages 1 and 135); disclose the unit of “AI workforces” (instead of merely stating “offered over 80,000 AI workforces to customers...” (pages 2, 136 and 151); disclose clearly whether the financial information the six months ended 30 June 2024 is audited, reviewed or unaudited (e.g. page 14 and other applicable pages); disclose the underlined phrase “<i>our Directors (including any proposed director who is named as such in this Prospectus) collectively and individually accept full responsibility...</i>” (page 79); and revise the drafting by using the wording “<i>in each year during the Track Record Period</i>” when describing the Group’s top five and largest suppliers throughout the Prospectus to avoid confusion that	

	the top five and the largest suppliers in each year during the Track Record Period are the same entities.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	1, 2, 3, 5, 35, 61, 107, 108, 120, 124, 149, 152, 156, 157, 159, 160, 162

Appendix III
Responses to the 1st SFC Comment Letter

No.	SFC's comments and Company's responses	Post Application 1st Proof Page No.
Principal Comments		
<i>Business</i>		
1.	The draft prospectus fails to provide sufficient information for investors to properly understand and assess the Group's relationships with its channel partners and their significance to the Group's business (page 177). For instance, it is unclear as to	
	(a) the number of customers introduced by the channel partners to the Group and the revenue derived therefrom, and the amount of service fees paid by the Group to its channel partners, in each of the years/period comprising the Track Record Period;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	147
	(b) the number of channel partners engaged by the Group in each of the years/period comprising the Track Record Period, and their profile and scale of operation; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	147
	(c) whether the channel partners or their ultimate beneficial owners have any other past or present relationships (including, without limitation, family, business, employment, financing, trust, shareholding or otherwise) with each of (i) the customers introduced or the ultimate beneficial owner(s) of such customers; and/or (ii) the Company or its subsidiaries, their controlling or substantial shareholders, directors, supervisors or senior management, or any of their respective associates, and if so, the details thereof. Please address with appropriate disclosures.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	147
2.	The draft prospectus is not entirely clear as to the background of each of the Group's major customers and the solutions provided to them by the Group during the Track Record Period (pages 180 to 183). For instance, it is unclear as to, for each of the Group's five largest customers in each of the years/period comprising the Track Record Period,	
	(a) the specific solutions under GJ AI workforce solutions procured from the Group; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	150, 151, 152

	(b) whether they are end users or integrators of the Group's solutions, and in the case of the latter, the identities and background of the ultimate end users of the integrated solutions.	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company further submits that it is not practicable for it to collect and disclose the identity information of ultimate end users of the integrated solutions. The Company's direct customers, as integrators, purchase solutions from the Company and then integrate such solutions into their own comprehensive solutions to the end users. It is less practicable for the Company to obtain consent from such end users, as they are integrators' customers, instead of the Company's.	150, 151, 152
	In addition, it is unclear as to the scale of operation of those customers (such as Customer D, Customer I, Customer J and Customer L) which became the Group's five largest customers shortly after their establishment despite their apparently minimal registered share capital, and how each of them became acquainted with the Group.	
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company further submits the background information of Customer D, Customer I, Customer J and Customer L as follows: Customer D Customer D is a software and information technology service provider founded in 2024, with a registered share capital of RMB5.0 million, headquartered in Jiangsu province. To the best of the Company's knowledge, Customer D has approximately 500 employees and recorded annual revenue of RMB300 million in 2025. Customer D primarily focuses on informatization projects for enterprises in healthcare services and pharmaceutical industries, providing training and corporate promotional consultation services. Utilizing the Company's GJ AI workforce solutions, Customer D expects to benefit from the integration of digital human agents into training, promotional and consultancy service offerings during its daily operations, achieving cost-effective digital transformation. To the best of the Company's knowledge, Customer D became acquainted with the Group through word-of-mouth referrals. Customer I Customer I is a software and information technology service provider founded in 2023, with a registered share capital of RMB1.0 million, headquartered in Fujian province. As an enterprise specializing in the R&D of natural language processing and generative technologies, Customer I has nearly 100 employees. To the best of the Company's knowledge, the newly established Customer I encountered the Company's offerings on its promotional pages and proceeded to initiate a purchase as it found the Company's solutions well-suited to their business needs for advancing intelligent industrial upgrades through semantic technology.	152

	Customer J Customer J is a software and information technology service provider founded in 2023, with a registered share capital of RMB30.0 million, headquartered in Guangdong province. As a company specializing in providing information technology integration and digital services, Customer J has nearly 100 employees. Customer J first became aware of the Company's solutions through marketing channels, and found GJ AI workforce solutions aligned with its technological requirements during its initial development stage. Customer J subsequently approached the Company and established collaboration relationship with the Company. Customer L Customer L is a technology promotion and application service provider founded in 2023, with a registered share capital of RMB10.0 million, headquartered in Guizhou province. To the best of the Company's knowledge, Customer L specializes in digital transformation for government and public service enterprises and recorded annual revenue of RMB1.2 billion in 2024. Customer L has served over 300 customers across finance, energy, cultural tourism, and public service sectors, empowering them to reduce costs, enhance efficiency, and enable intelligent decision-making. Through word-of-mouth referrals, Customer L became acquainted with the Group.																																				
	Please address with appropriate disclosures, and submit the details of each of the projects with the Group’s five largest customers in each of the years/period comprising the Track Record Period, including but not limited to, the revenue contribution, the contract sum, the date of commencement and acceptance date of the relevant projects.																																				
	Please refer to the revised disclosure in the Post Application 1st Proof. The Company respectfully submits the details of each of the projects with its five largest customers in each of the year during the Track Record Period as follows: Year Ended December 31, 2025 <table><tr><th>Customer</th><th>Project No.</th><th>Revenue contribution (RMB’000)</th><th>Contract sum (RMB’000)</th><th>Date of commencement</th><th>Acceptance date</th></tr><tr><td>Customer A</td><td>97 projects in total*</td><td>325,548</td><td>344,929</td><td>December 12, 2023</td><td>December 31, 2025</td></tr><tr><td rowspan="2">Customer M</td><td>1</td><td>17,345</td><td>19,600</td><td>August 20, 2025</td><td>December 31, 2025</td></tr><tr><td>2</td><td>18,142</td><td>20,500</td><td>August 20, 2025</td><td>December 31, 2025</td></tr><tr><td>Customer B</td><td>1</td><td>27,323</td><td>29,800</td><td>October 25, 2024</td><td>March 28, 2025</td></tr><tr><td>Customer D</td><td>1</td><td>1,036</td><td>1,297</td><td>August 15, 2025</td><td>September 30, 2025</td></tr></table>	Customer	Project No.	Revenue contribution (RMB’000)	Contract sum (RMB’000)	Date of commencement	Acceptance date	Customer A	97 projects in total*	325,548	344,929	December 12, 2023	December 31, 2025	Customer M	1	17,345	19,600	August 20, 2025	December 31, 2025	2	18,142	20,500	August 20, 2025	December 31, 2025	Customer B	1	27,323	29,800	October 25, 2024	March 28, 2025	Customer D	1	1,036	1,297	August 15, 2025	September 30, 2025	149

* Given the significant number of projects the Company served for Customer A during the relevant year, the tables above summarize the total revenue						

	contribution, contract value, and project duration for all projects for Customer A during the same year.	
	Please also advise the details of the independent due diligence conducted by the Joint Sponsors in ascertaining the existence and reasonableness of the demand for the Group's solutions from the major customers or their end customers, where applicable.	
	The Joint Sponsors conducted the following due diligence steps, with a conclusion that nothing has come to the attention of the Joint Sponsors that would reasonably cause the Joint Sponsors to cast doubt on the existence and reasonableness of the demand for the Group's solutions from the major customers or their end customers: (i) discussed with the management of the Company to understand, among others, (a) business model and competitive strengths of the Group, (b) customer demand for the Group's solutions, and (c) the prospects of the digital human agent markets where the Group operates; (ii) conducted due diligence interviews with and site visits to major customers of the Group (including the five largest customers for each year during the Track Record Period, the "Five Largest Customers") to understand, among others, (a) background information (including business activities, scale of operation and number of employees) of the major customers, (b) terms of business relationship with the major customers, (c) transactional amount and during the Track Record Period, (d) settlement of payables of the major customers during the Track Record Period, (e) whether the major customers are end users of the Group's solutions, and if so, the background of their end users, and (f) the major customers' demand for the Group's solutions; (iii) obtained and reviewed, on a sampling basis, the walkthrough documents (such as agreements, order confirmation, delivery documents or invoices) for the transactions between the Group and its major customers (including the Five Largest Customers) during the Track Record Period; (iv) obtained and reviewed the background search reports of the major customers of the Group (including the Five Largest Customers) issued by an independent third-party background search agency, which did not identify any material investigations, disputes, penalties or negative news that may materially affect business relationship between the Group and such customers; and (v) obtained and reviewed the Industry Report, and discussed with CIC on its view that (a) there is considerable demand for the Group's GJ AI workforce solutions in China, and (b) the digital human agent markets where the Group operates have substantial growth potential.	N/A
3.	The draft prospectus is not entirely clear as to the research and development capabilities of the Group and the intellectual properties derived therefrom. For instance, it is unclear as to	

	(a) whether all the models and modules underlying the Group’s core AI technologies were self-developed by the Group (pages 166 to 167), and the extent of the Group’s reliance on any technologies developed by third parties, including any foundation AI models; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	137
	(b) details of the Group’s research collaborations with education institutions and research institutes (page 170), including, but not limited to, the significance of the intellectual properties developed under such collaborations, if any, to the Group’s business operations, and the arrangement in relation to the ownership of such intellectual properties and details of other salient terms of the collaboration arrangements.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	141, 142
	In this connection, we note that the Group acquired “project implementation services” from its major suppliers during the Track Record Period (pages 191 to 194) but the draft prospectus is unclear as to the nature of such services and whether such services related to procurement of technologies developed by third parties. Please address with appropriate disclosures.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	162
History		
4.	The draft prospectus fails to provide sufficient information on the Group’s disposal of Nanjing Wanrui (the “ Disposal ”) for investors’ proper understanding of its implications on the Group. It is merely disclosed that the Group disposed of Nanjing Wanrui by terminating the relevant contractual arrangements in November 2024 (page 123), with no information on	
	(a) the circumstances leading to the adoption of the contractual arrangements in the first place;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	94
	(b) the total and net assets of Nanjing Wanrui as at the end of each of FY2022 and FY2023 and immediately prior to the Disposal;	
	Please refer to the revised disclosure in the Post Application 1st Proof.	95
	(c) whether Nanjing Wanrui was the subject of any material noncompliance or was involved in any pending or threatened litigation, arbitration or administrative proceedings immediately prior to the Disposal, and if so, the details thereof; and	
	Please refer to the revised disclosure in the Post Application 1st Proof.	95

	(d) details of the “ <i>value-added telecommunication services</i> ” provided by Nanjing Wanrui during the Track Record Period, whether the Group continues to carry on or require any “ <i>value-added telecommunication services</i> ” after the Disposal and how, where applicable. Please address with appropriate disclosures.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	95
<i>Financial information</i>		
5.	The listing application materials fails to provide an analysis by age group and major clients of the Group’s outstanding trade receivables and the subsequent settlement as requested in item 2 in the Form M104 submitted on 31 October 2025. Attachment M104(2) merely discloses a breakdown of the revenue attributable to each of the Group’s five largest customers in each of the years/period comprising the Track Record Period. Please address.	
	Please refer to the updated Form M104(2).	N/A
<i>Companies (Winding Up and Miscellaneous Provisions) Ordinance (“CWUMPO”)</i>		
6.	The draft prospectus is silent on the consideration paid (if any) by each of the grantees for, and the exercise period of, the options granted under the Pre-IPO Share Option Plan, as required under paragraph 10 of the Third Schedule to the CWUMPO (pages VI-15 to VI-21). Please address with appropriate disclosures.	
	Please refer to the revised disclosure in the Post Application 1st Proof.	VI-12, VI-18

Schedule I

Level	Digital Human Agents <i>Proposed in the prospectus</i>	Autonomous Driving <i>Proposed by SAE</i>	AI Agents <i>Proposed by Chairman of 360 Group</i>	Humanoid Robots <i>Proposed by Beijing Humanoid Robot Innovation Center</i>
L1	Conversational Assistance: Fully defined by human operators, the system executes passive, single-turn, simple responses and generates natural replies based on the current dialogue, with no independent problem-solving or tool integration capabilities.	Driver Assistance: The system provides support in a single dimension (either longitudinal or lateral), with human drivers fully controlling and assuming responsibility for the operation.	Chat Assistant: Strictly defined by single human commands, with no autonomous task-planning logic. The chat assistant generates content based on a single prompt, functioning as a reactive content tool without independent task logic.	Basic Level: Pre-programmed or real-time directed by human operators, heavily reliant on input instructions. At a basic level, the system has preliminary perception and execution capabilities but depends on real-time human control or precise programming, with no environmental understanding or autonomous decision-making.
L2	Ratiocination Capability: Defined and supervised by humans, the system proactively utilizes tools such as knowledge graphs or third-party tools to plan and execute multi-step tasks within a given framework, achieving closed-loop resolution.	Partial Driving Automation: The system can handle tasks across both longitudinal and lateral function dimensions, while human drivers must supervise and be ready to take over at any time	Low-Code Workflow Agent: Guided by human-defined workflow rules, the system automates processes that involve multiple tool calls. It can independently decompose tasks and leverage various tools to execute standardized workflows based on high-level directives under human oversight	Partial Interaction Level: The system executes a series of logically connected tasks based on a human-defined program, requiring continuous supervision throughout.
L3	Task Execution: Under specific conditions, the system can	Conditional Driving Automation: Under defined conditions, the	Inference AI Agent: Upon receiving a domain-specific	Interactive Level: Humanoid robots autonomously

	understand dynamic environments and assume responsibility for executing complex, non-predefined tasks on behalf of humans, intervening only when necessary or requested by the system.	system can assume full responsibility for driving , including real-time environmental perception and decision-making, with driver intervention required only when prompted by the system.	objective , the system autonomously reasons, evaluates, and executes expert-level solutions, with human involvement limited to final validation.	complete well-defined tasks in dynamic, complex environments, with human involvement limited to establishing high-level objectives.
L4	• Autonomous Execution: The system operates fully autonomously within a defined range, utilizing meta-learning and reinforcement learning to iteratively optimize strategies based on task feedback, driving continuous performance enhancement and adaptation.	• High Driving Automation: Within a defined Operational Design Domain (ODD), the system can independently handle all driving tasks without human intervention, even in case of failure. It continuously improves through data feedback and algorithm iteration, enabling "driverless" operation within the designated area.	• Multi-Agent Swarm: Multiple AI agents autonomously team up to solve complex problems, exhibiting collective evolutionary capabilities.	• Highly Autonomous Level: The system can operate autonomously in unknown environments, making independent decisions, planning, and executing tasks. It leverages experience to adapt its strategies and improve performance in similar future environments.
L5	• Collective Intelligence: Multiple Digital Human Agents autonomously form an organized structure with mechanisms for collaboration, competition, and innovation, capable of strategic planning and participating in real-world value creation, much like an enterprise or team.	• Full Driving Automation: The system operates autonomously across all human-accessible driving scenarios	• AI Agent auto-generation: The system possesses the ability to create and optimize new AI agents, forming a self-sustaining, continuously evolving intelligent ecosystem with self-creation and iterative capabilities.	• Fully Autonomous Level: The system exhibits human-like general intelligence and lifelong learning capabilities, enabling it to autonomously operate, adapt, and collaborate in diverse and complex environments.
