南京硅基智能科技集團股份有限公司

Management Continuity Analysis

This memorandum sets forth the requirements for management continuity under the Listing Rules, and the compliance by Nanjing Silicon Intelligence Technology Group Co., Ltd. (南京硅基智能科技集團股份有限公司) (the “**Company**,” together with its subsidiaries, the “**Group**”) with such requirements for the purpose of the Listing. Unless the context requires otherwise, terms used herein shall have the same meanings as those defined in the application proof of the prospectus of the Company dated ~~October 31, 2025~~[April 10, 2026](#) (the “**Prospectus**”).

RULES AND REQUIREMENTS

The Company is seeking the Listing under the market capitalisation/revenue test under Rule 8.05(3) of the Listing Rules. Pursuant to Rule 8.05(3)(b) of the Listing Rules, a new applicant must satisfy that it has “management continuity for at least the three preceding financial years.” The three preceding financial years of the Listing are the three financial years ended December 31, ~~2024~~[2025](#).

Paragraph 2 of Practice Note 3 of the Listing Rules gives further guidance on the interpretation of the requirement for substantially the same management as follows:

“In all cases the trading record period of a new applicant must enable the Exchange and investors to make an informed assessment of the management’s ability to manage the applicant’s business and the likely performance of that business in the future. In order to make this assessment the applicant must be able to satisfy the Exchange that its main business or businesses, as at the time of listing, have normally been managed by substantially the same persons throughout the period of the qualifying trading record and that such persons are the management of the new applicant.”

Furthermore, according to Chapter 1.1B of the Guide for New Listing Applicants issued by the Stock Exchange, the Stock Exchange states that it ordinarily considers the management continuity requirement to be a question of fact and will assess the substance of the management. In making this assessment, the Stock Exchange principally considers the following:

- (a) whether an identifiable group of individuals most relevant and responsible for the track record results of an applicant remained in positions of responsibility with the applicant throughout the relevant track record period;
- (b) whether such group of individuals would form the core management of the applicant at the time of listing and thereafter;

- (c) whether the management of the actual operation of an applicant that contributed directly to the track record results had been entrusted to specific directors or senior management; and
- (d) attributing proportionately greater responsibility to officers with more senior positions than those with more junior positions to reflect the formal responsibilities of senior officers in their corporate roles.
